Product Description of 2 Weeks Maturity Foreign Currency Deposit to be confirmed prior to concluding

the Customer Agreement on Foreign Currency Deposit for PowerFlex Account

(This is the pre-contract document to be delivered based on the laws and ordinances before concluding the aforementioned Agreement, and doubles as the product description of foreign currency deposits, etc.)

Please read this document carefully and understand fully the following before your application.

- ① 2 Weeks Maturity Foreign Currency Deposit is defined as a time deposit in foreign currency (currencies other than yen) to mature in 2 weeks, and cancellation before maturity is not permitted in principle.
- ② Cancellation before maturity is not permitted in principle. If SBI Shinsei Bank (hereinafter referred to as the "Bank") agrees to the cancellation prior to the maturity for any reason that the Bank deems justifiable, the principal shall be paid, and no interest shall accrue.
- ③ Foreign currency deposits entail the risk of foreign exchange rate fluctuation. When a customer places a 2 Weeks Maturity Foreign Currency Deposit by exchanging yen into a foreign currency, the customer may incur exchange losses in terms of yen depending on the trends in the foreign exchange market, with the result that the funds to be repaid when translated into yen would be smaller than the yen amount initially deposited.
- ④ Deposit in foreign currency cash is not accepted. Withdrawal in foreign currency cash is not accepted at the Bank branches.

Risk of principal being less than original investment due to exchange rate fluctuation:

When a customer places the Deposit by exchanging yen into a foreign currency, the customer may incur exchange losses - in terms of yen - depending on the trends in the foreign exchange market, with the result that the funds to be repaid - when translated into yen - would be smaller than the yen amount initially deposited.

Fees and charges:

- When a customer starts 2 Weeks Maturity Foreign Currency Deposit (hereinafter the "Deposit") in yen, the Bank-designated telegraphic transfer selling rate (TTS rate) which includes foreign exchange fee will apply to exchange a yen original investment to the Deposit principal. Then, the Bank-designated telegraphic transfer buying rate (TTB rate) which includes foreign exchange fee will apply to exchange withdrawal or interest amount from a foreign currency to yen. Therefore, there is a risk of principal being less than the original investment even if foreign exchange rates do not fluctuate.
- A customer is allowed to switch the Deposit principal remitted into a foreign currency savings deposit to another foreign currency, provided, however, that those foreign currencies shall be currencies eligible for a direct non-JPY cross currency exchange. The Bank-designated foreign exchange rate which includes foreign exchange fee will apply when switching a currency.

Details can be found in the after-mentioned "Fees and Charges relating to Foreign Currency Deposits".
